

####//!!!-----Remote--Neural--Monitoring-----!!!\\## ;  
Linux beats FreeBSD ; clear ; speaker-test -t sine -f 963 -l  
100000000 ;  
The brain has no firewall so 963 an ESP activator must be the  
firewall ;  
963 is labeled as a Krishna Consciousness of PSI and ESP aka  
Kundalini ;  
So listening to it as a 0.1 sine wave tone as MP3 32k should  
work ... ;  
Lower frequencies like 43.5 actually gave me a headache  
somehow ... ;  
963 has to be the frequency if it is linked to PSI and  
Telepathy ... ;  
528 is said to clean the water , however 7.831 as EMF does  
same ... ;  
So many people swear on 528 , however 963 is linked to  
Telepathy ... ;  
The Fake TI Community never dare talks about Psychics or Remote  
Viewing ;  
Controlled Remote Viewing or Zionism is never ever talked about by  
agents ;  
I am so glad to discover 963 sine at 0.1 as a solution to  
headaches ;  
Since RNM is caused by Starch and Carb/Gluten Diet in the TI (963)  
;  
I got to admit if you are Gang Stalked and you eat Chips Ahoy your  
;  
head will get a cluster headache , because on KST gov watch-list ;  
A tone which amplifies PSI just like 7.831 as EMF is an enemy to  
them ;  
One easy solution Remote Neural Monitoring and the Cluster  
Headaches ;  
is 963 Hz Sine Wave Tone @ 0.1 Amplitude as 32k MP3 57 Minutes ;  
This can be done in either Adobe Auditions or Audacity and the ;  
file can be backed up , this solfeggio tone might work , because ;  
it is associated with Extrasensory Perception or Telepathy/PSI ;  
They probably want all this information sabotaged aka the Zionists  
;  
This tone of 963 ~ @ 0.1 in Audacity on Kubuntu Linux to  
work ... ;  
I tried sun gazing which is dangerous if not during sunset/rise ;  
I tried urine therapy and distilled water , I tried Alkaline h2o ;  
form Baking Soda , Lime Juice , Citricare , Colostrum , Fasting ;  
people take a pharma drug for the Remote Neural Monitoring ... ;  
Distilled water if possible or good old 30PPM water is good ... ;  
The Sheeple all use Microwave Ovens which Kills the Water ---- ;  
I just add lime juice to the 30 PPM water and it hydrates ... ;  
This shit is so complicated being on a KST to be Gang Stalked ;  
Luckily being awake to the NWO and Zionism I discovered 963 Hz ~ ;  
####//!!!-----Remote--Neural--Monitoring-----!!!\\## ;

```
###//!!!-----This--is--an--update-----!!!\\### ;  
sudo -i / su root / cd /media/kubuntu/011A-4448 / ll / ./ ... ;  
chmod -R 777 unetbootin-linux-702.bin yes >/dev/sd..... ;  
chmod +x unetbootin-linux-702.bin ./unetbootin-linux-702.bin ;  
Belanaetcher/cat/dd/Win32 Disk Imager/Unetbootin are the shit ;  
Windows still has the Old FS that is why everyone is on SSD ;  
My New Setup with Unetbootin will be the best one I got , ... ;  
because I will have Luks with a Fat32 and Unetbootin ..... ;  
Gonna Stop the Gang Stalking by combining Luks with Unetbootin ;  
And setting 2 BIOS Passwords so The perps do not Flash BIOS ... ;  
These Telepathic Gang Stalkers literally Go in your House ... ;  
I hate Windows and Mac OS and Android, because they are Jewish ;  
So I decided to use Unetbootin with Luks if the SSD OS gets ;  
bricked or corrupted or whatever : Dissenter.com / Kubuntu.org ;  
https://unetbootin.github.io / https://iristech.co/iris-mini/ ;  
Privacy Badger and Ublock Origin (SSD is Luks w Unetbootin ) ;  
Now when the OS gets bricked due to severe gang stalking it will ;  
be no problem , I set a BIOS so they can't flash the BIOS .... ;  
The gang stalker put a FS Corrupter Bootkit for Unix/Linux ... ;  
All I had to do was wipe the POS with yes >/dev/s / fdisk -l ... ;  
What it does is it chmods and locks data aka Linux  
Ransomware ... ;  
All you have to do now is use Unetbootin with Luks to stop  
them ... ;  
I wgeted the latest iris mini/Kubuntu/Dissenter/Brave/Unetbootin ;  
The finish : fdisk -l ; dd if=/dev/sd of=/dev/sd bs=1M count=5096 ;  
/dev/sdc1 = 4096 MiB GAP /dev/sdc2 = 666 MB GAP ...6096... ;  
New > Linux Swap > 4096 > New EXT4/Luks > Full Size Quota ... ;  
sudo -i chmod -R 777 /media/luks ; ls ; f4f4f4f4f4 mac addr ; cd ;  
45.60.1.1 DNS now with the Luks Chmodded to 777 things just work ;
